Help test HolidayHQ

Your whole holiday in one place: your day-by-day plan, your reservations and tickets, the map and your photos. You don't book anything with it, you plan and keep your trip in it. Try it at your own pace with a real trip or a dream trip.

VERSION

1.0.0 beta

DURATION

About 2 weeks

QUESTIONS

support@holidayhq.nl

1 Install

Open the links on your phone.

Android GOOGLE PLAY

- 1 Join the tester group with the Google account on your phone: groups.google.com/g/holidayhq-beta
- 2 Open play.google.com/apps/testing/nl.timimpact.holidayhq and tap **Become a tester**.
- 3 Install **HolidayHQ: Trip Planner**. It says "Early access", that is expected.
- 4 New versions arrive as a normal update in the Play Store.

iPhone TESTFLIGHT

- 1 Install Apple's free **TestFlight** app from the App Store.
- 2 Open testflight.apple.com/join/bw9Xt7Ny on your iPhone.
- 3 Tap **Accept** and then **Install**.
- 4 New versions show up in TestFlight. Tap **Update** there.

Know someone who wants to test too? Feel free to pass this guide on. Anyone with the links can join.

2

Create your account

Once, a few minutes.

- 1 Open HolidayHQ. You first get a short four-screen tour.
- 2 Tap **Start planning** and fill in where you're going and when.
- 3 Create your account with your email address and a password of at least 10 characters.
- 4 Confirm your email address with the email from HolidayHQ and sign in.
- 5 Turn on two-step verification with an authenticator app, such as Google or Microsoft Authenticator. You need it for documents and for inviting people. The app walks you through it.

After a while the app asks you to sign in again. That is on purpose, because your travel documents are in it.

3

Test checklist

Tick off what you tried. You don't have to do everything.

Something doesn't work, or doesn't make sense? That is exactly what Tim wants to hear. Your ticks are saved on this device.

Plan a trip

On the overview and in Itinerary.

Create a trip and pick a cover photo

Add activities by searching for a place, like a restaurant, museum or theme park

Type your flight number in **Flight number** and see if airports and times fill in by themselves **NEW**

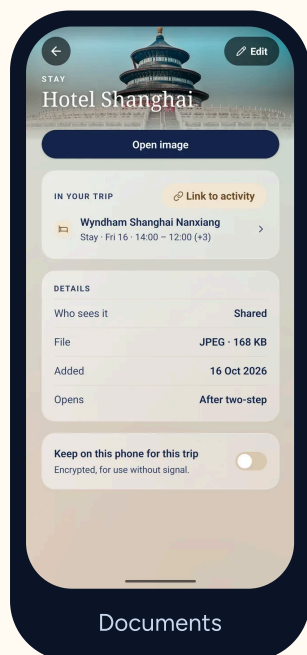

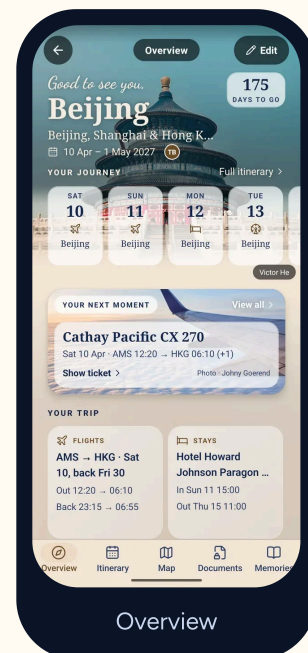

Plan a trip with several cities and check that each day shows the right city **NEW**

Save an idea or a list in **Ideas**

Look at the tips in **Picked for you**

Reservations and documents

Let the app read your confirmations.

Tap **Start from my tickets** and add a confirmation as a PDF, screenshot or photo. Did the app read it correctly? **NEW**

Also try a scanned PDF or a photo of a paper ticket **NEW**

Open a ticket in **Documents** and save it on your phone, so you have it without internet too

Get ready

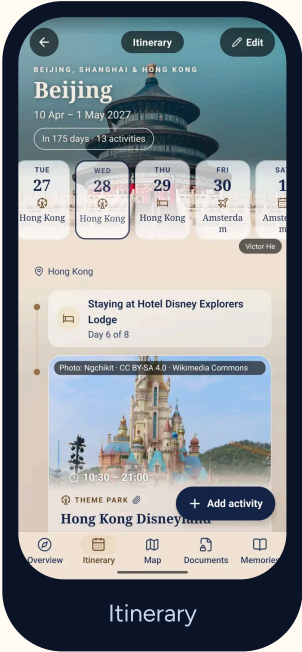

Passport, visa and what still needs doing.

- ☐ Look at the **Get ready** card on your trip overview **NEW**
- ☐ Open the **Checklist** from your trip settings (For you > Checklist). Choose your passport and check that the passport and visa info is right **NEW**

On the road

Your day in Itinerary and on the map.

- ☐ View your day in **Itinerary** and on the **Map**
- ☐ Open a place in your own maps app
- ☐ Put your phone in airplane mode and see what you can still view

Memories and travelling together

Photos per day and travel companions.

- ☐ Add photos to a day in **Memories** and mark a favourite
- ☐ Invite someone you travel with and see what they see
- ☐ Watch the tour again via Account > Help > **Show the tour** **NEW**

i

What we already know

No need to report these.

Reading confirmations

You can have a limited number read per day.
After that the app reads them the older, simpler way.

Flight info

Works up to about a year ahead, with a limited number of lookups per month for all testers together.

Checklist ticks

What you tick off is only on your own phone, not with your travel companions.

Invites on iPhone

An invite link sometimes opens the website first instead of the app.

4

Give feedback

Everything is welcome: broken, unclear, missing or just nice.

QUICK NOTE

Email Tim

At support@holidayhq.nl

ANDROID

Private feedback to developer

At the bottom of the app page in the Play Store. Only Tim sees it.

IPHONE

Screenshot in the app

TestFlight then offers to send it as feedback.

Include as much as you can:

What you did
the steps before it

What you saw
ideally with a screenshot

What you expected
how it should have gone

Your phone
make and model

✓

Privacy and safety

A few ground rules.

Never share passwords, codes or your authenticator QR code, not even with Tim. He will never ask for them.

• Check what is on your screenshots before you send them, like reservation numbers or your passport.

- When the app reads a confirmation, it goes to an AI service (Anthropic) to pull out the details. Your passport is only read on your phone and never sent.
 - Keep your original tickets somewhere else too. This is a test version.
 - You delete your account and everything in it yourself via Account › Delete account. More at holidayhq.nl/privacy.
-

Thank you for testing!
